

APPLICATION TEASER

Back-up insulation steel ladle

BENEFITS

- Capacity increase:
 - Best performance/ thickness ratio
- Production efficiency increase
 - Homogeneous production temperatures
 - Reduced temperature differences over the lining
 - Uniform expansion of the brick lining
 - Extended time between maintenance cycles
- Financial and sustainability saving:
 - Reduced heat loss & energy consumption
 - Reduced CO2 footprint
 - Easy to install and safe to disassemble
 - strong and durable ensuring extended lifetime of insulation
- Safety:
 - Reduced surface temperature of the equipment

MOST COMMONLY USED PRODUCTS

- Microporous
 - Steelflex® or Steelflex® -P, Promalight® 1000X
- Vermiculite
 - VIP 900 , VIP 12HT, VIP12HS
- Fibers
 - Dalfratherm® 1430 ZR
