## APPLICATION TEASER

Back-up insulation torpedo cars

### BENEFITS

- Capacity increase
  - Best performance/thickness ratio
- Production efficiency increase:
  - Optimised process & accurate temperature control
  - Prolonged travelling time due to reduced temperature drop
  - Use of Vermiculite allows torpedo car to be used as Pre-convertor
  - Longer lifetime extending maintenance cycle
- Financial & sustainability
  - Reduced CO2 footprint by improved energy efficiency
  - Reduced energy cost by reduction of heat loss
  - Easy to install Pre-shaped materials reducing installation cost
- Safety
  - Improve safety of operators by reducing shell temperature

### MOST COMMONLY USED PRODUCTS

- Microporous
  - Microtherm® Panel HY
  - Promalight® 1000X-M strips
- Vermiculite
  - VIP 900 , VIP 12HT
  - VIP12HS
- IFB
  - Promaton
